

SERVICE UPDATE

Humidynit Check Update Guide

Document ID HYN-QCK-001	Version 1.0	Updated 27 Aug 2026
----------------------------	----------------	------------------------

Source basis: Approved Humidynit Check update notice

Humidynit Check is being updated. The public Check workflow is not available while the next version is prepared.

What is being prepared

- Improved property and project context.
- Clearer recommendation framing.
- More useful reporting for follow-up.

Plan a project now

Prepare the site or project reference, observed issue, practical decision needed and useful non-sensitive evidence. Contact Humidynit directly through help.humidynit.com/contact-support/.

Useful context to prepare

- | | |
|--------------------------|---|
| ☐ | Site or project reference |
| ☐ | Observed condition and location |
| ☐ | Decision or next step needed |
| ☐ | Measurements with units and timestamps, when relevant |
| ☐ | Useful overview or detail photos |
| ☐ | Known product or hardware context |

Current boundary

This document does not provide a simulated Check, diagnosis or inactive controls. Current workflow guidance will be published when the updated version is ready.
